The lecture is an amouncement that some one master nation is to grow upon our globe, and the lecturer will make an appeal in favor of the extension of the rule of the American Government all over the northern half of the western bemisphore. An interesting feature is his denunciation of the Monroe Doctrine, which he characterizes as a diplomatic scheme, originating in English cumning, French Bonapartism, and American frechooterism. He regards as necessary to the safety of our institutions the government by American thought, and insists that America should not be made a Botany Hay for Europe. Besides watches to-day we shall also give diamonds and money. If you don't get the article yen want you may at least get something clee of equal value. We have decided to extend the time of giving out presents to April 1,00 that our riends from the most remote sections of the county will have ample time to send in their orders and get returns.
